

Doming takes on a life of its own with our new Helix Dome™. This outdoor-durable product has evolved to wrap around curved surfaces, transforming your brand into an entirely new being. The next evolution is here—the natural progression of dimensional printing.

Helix Dome™ adds a clear, non-yellowing, polymer coating on top of metal, giving your decal a “lens look”—with a twist! Due to the hardness of the polymer coating, indentations heal completely. Add form and flair to your nameplates and brand identity while keeping your parts resistant to UV exposure, dents, and scratches. Automotive-grade and marine-grade make Helix Dome™ an excellent choice for outdoor applications and with a wide variety of adhesives, the Helix Dome™ will give you the exact function you are looking for.

AT A GLANCE

ALUMINUM THICKNESS:

- .02"

RI-CLING THICKNESS:

- .04"
